

MODEL **530**

Validatable Medical Pouch Sealers

MODEL **540**

Plug N' Seal

The PERFECT SEAL every time.

With the Accu-Seal Model 530 Validatable Medical Sealer, you have absolute seal process control for validation in a table top impulse sealer. Now, seal your bags and pouches with complete confidence without stopping to adjust machine settings throughout production. Determine your seal process requirements and let your sealer do the rest.

The Digital heat timer, Digital electronic temperature control, and pressure regulator with gauge give you complete sealing process control for validation.

PORTABLE

Why fill your work area with a massive sealer? At 25 pounds, the 15" Model 530 and 540 get the job done and need only a 20" x 10" surface.

PERFECT PRICE

This model is the perfect solution for medical applications when faced with stringent budget constraints.

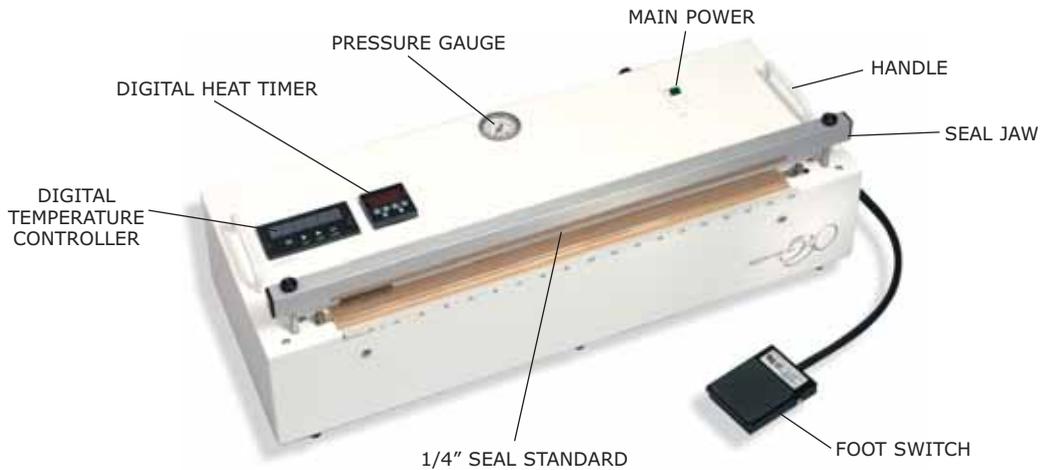

- External calibration ports allow for calibration without moving or modifying the machine.
- Safety designed in, not added on.
- Rigid welded steel enclosure with powder-coat finish is standard. Stainless Steel optional.

MODEL 540: Plug N' Seal

- All the same Features as the 530, but requires no external air supply.
